Summary

Software Developer skilled in building responsive web applications, scalable backend systems, and REST APIs, with experience gained through internship work and full-stack academic projects. Delivered real-world solutions including the ChargeNow EV charging platform with AI-based battery health analysis and Razorpay integration, and an E-Service booking platform for device repair and maintenance. Focused on writing clean, efficient, user-centric code.

Experience

Web Developer Intern

June 2024 – March 2025

Akash Technolab

1 Year

- Contributed to the design, development, and maintenance of responsive, user-friendly web applications.
- Collaborated with the development team, gaining hands-on experience in frontend and backend development practices.

Technical Skills

Programming Languages: Python, PHP, C, C++, Java (Beginner)

Frontend Development: HTML, CSS, JavaScript, Bootstrap

Backend Development: Python (Django), Node.js, PHP, REST APIs

Database Management: MySQL, MongoDB, Relational Databases, Query Optimization

Cloud & Deployment: AWS (EC2, S3, IAM – Basics), Cloud Deployment Fundamentals

Education

GLS University

Pursuing

Master of Science in Information Technology (MSc-IT) – Specialization: Full Stack Development

GLS University

07/2022 – 04/2025

Bachelor of Computer Application (BCA) – 7.58 CGPA (75.8%)

Projects

ChargeNow (Mobile Application)

2025 – 2026

Django — Python — Razorpay API — AI/ML

- Developed an on-demand EV charging app enabling users to book charging vans at their location.
- Implemented user authentication, real-time booking, slot selection, and service tracking features.
- Integrated Razorpay for secure online payments.
- Built an AI-based model to analyze car battery health and suggest optimal charging schedules and services.
- Designed a responsive frontend and developed backend APIs using Django for managing users, bookings, and services.
- Customized the Django Admin interface by modifying admin templates to efficiently manage charging vans, users, bookings, payments, and transactions.

E-Service Care & Maintenance

2024 – 2025

HTML, CSS, JavaScript, Bootstrap, jQuery — PHP, MySQL

- Built a website where people can book experts to repair or maintain their electronic devices.
- Helped users easily schedule appointments and manage service requests, making device care simple and convenient.
- Developed backend functionality using PHP and MySQL for efficient data handling and storage.

Certifications

- **Data Analytics Job Simulation** – Deloitte (via Forage), November 2025. Enrolment Verification Code: aTw7it4mS7THevXEG.
- **5-Day AI Agents Intensive Course** with Google & Kaggle, December 2025 – Focused on building intelligent agents using LLMs, prompt engineering, and automation.
